

Voyage européen en Italie (Sicile)

Dans le cadre de notre partenariat, nos élèves de première aéronautique participant au cours de DNL (Discipline non Linguistique) ont eu le plaisir d'aller découvrir et étudier une semaine à Catane (Sicile – Italie).

Et pour savoir comment cela s'est passé, rien de tel qu'un petit résumé fait par l'un de nos élèves !

Little feed-back

This week was very rich on a cultural and educational level. The way of living in sicily is a little different but we knew how to adapt and the integration went extremely well. All the families were great. We had the chance to learn with Italian students. The lessons are slightly different than ours because it is a school that train futur pilots and air controllers. We also could test their great flight simulator. We went to visit the city and tasted some typical food. The place was beautiful and the meal tasted very good. I would say , that the only negative point that it's gone toot fast !
