

# 2040

*This story takes place in a post-apocalyptic world, after an out of control epidemic ravaged human civilization 15 years earlier.*

*The two main characters Joë and Ella must recover healing and food to advance in their quest and triumph over the infected and the hostile survivors they meet.*

*The goal of this quest is to take Ella to a place where people can help her, because she has a ramede that could save all of humanity.*

*Peter Parker*

## STRANGE INFECTION

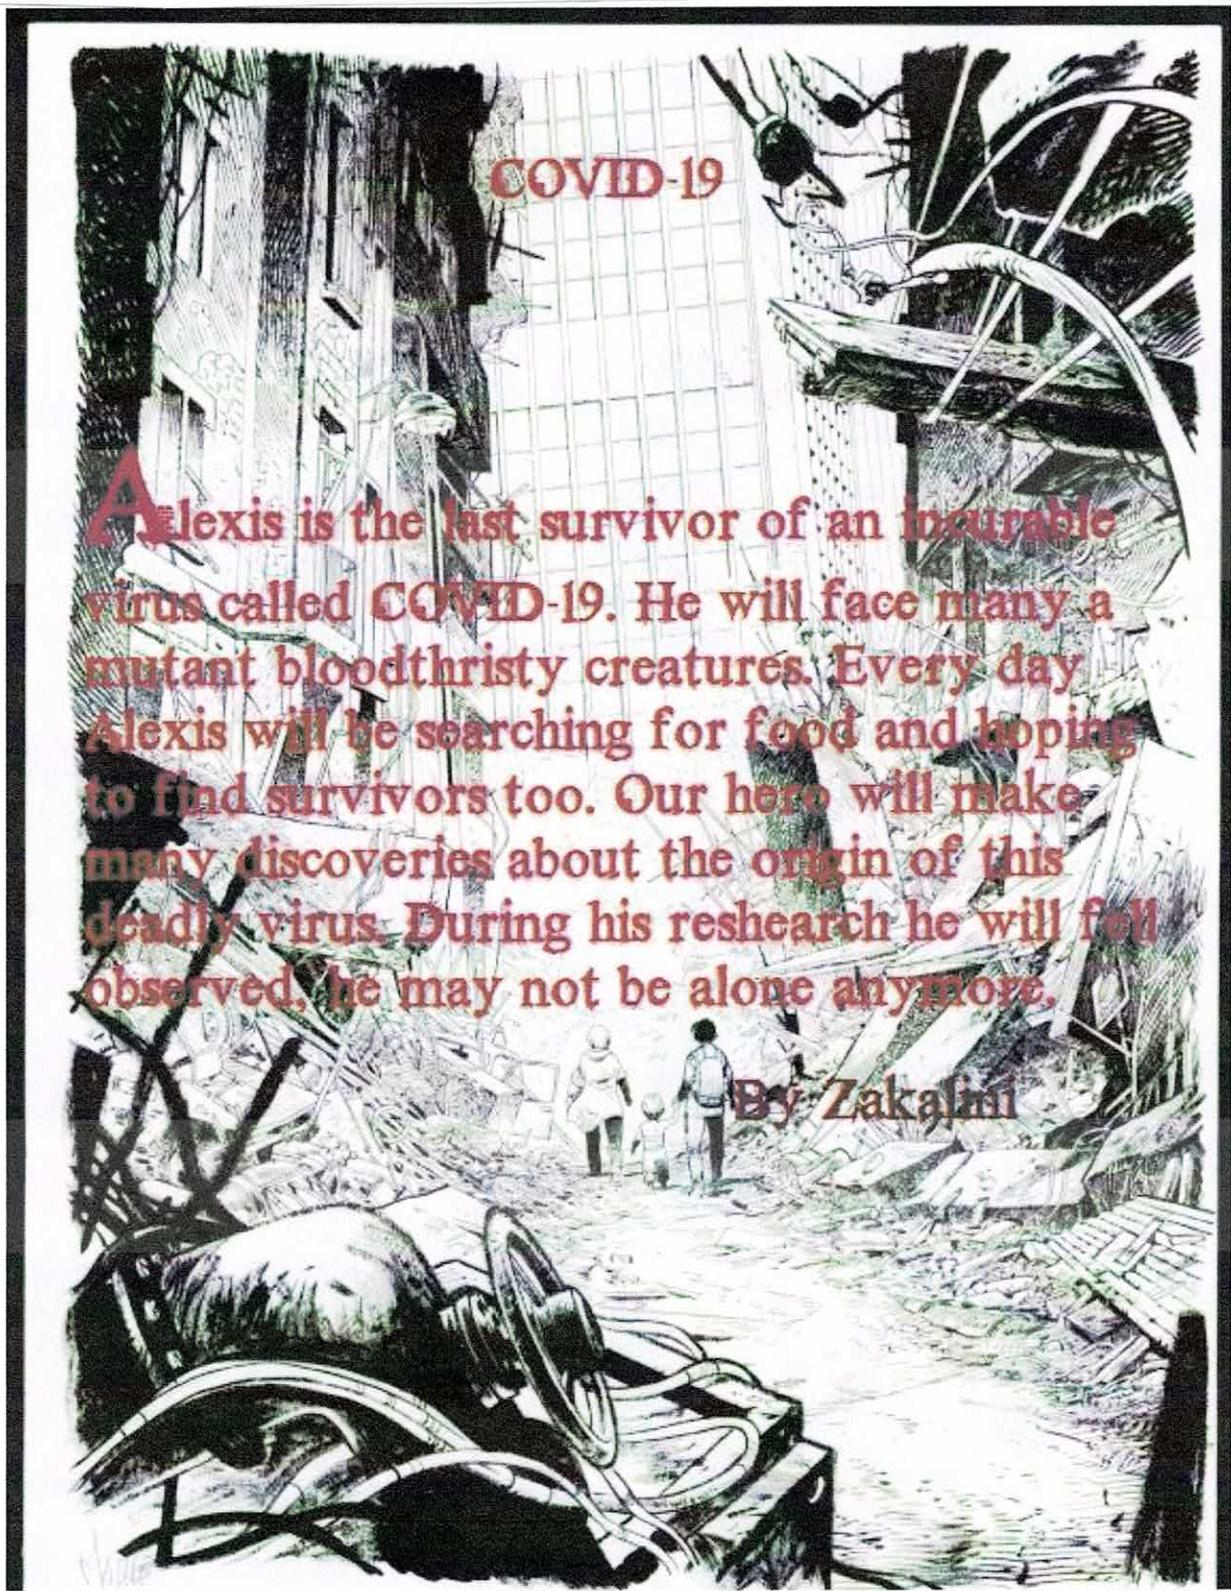

John Smith is a survival of the corona virus. After the end of the confinement, the Earth has discovered new human beings : the infected people have changed their behaviors. They are unable to think by themselves, they became predators, hunt non infected people in the city. John Smith knows the vaccine isn't good enough and has changed people. The vaccine-police is after him to inoculate him the poison they call vaccine. He wants to leave the town one night and takes refuge in a hut in the forest. One day after, he hears something, like a growl. It repeats every night louder and louder. How can he escape and save his life from these mutants ? Why has this crazy scientist created a vaccine which turns human in animals ? Follow the adventures of John Smith to know how he's going to escape from a certain death and how he will save the world ...

The Containment

Loïc student in third class has always dreamed to becoming a doctor. He studied the whole human body, he studied all pandemics, and he loves history. So when the government announces the containment until further notice, he spends his time to imagine, a child of his age but at the time of the Spanish flu 102 years ago.

A book steeped in history, filled with knowledge about this plague who fell down 102 years ago. A history of the vision of a teenager on the current era missing with that of the beginning of the century: rewarding.

# THE PANDEMIC'S STORY

In Savigny sur Barge, the morning of March 16, 2020, Thomas received a phone call all announcing terrible news. a virus would kill thousands of people. no one left the streets, no signs of life outside.

Thomas had a huge thrill, how will the hours and days that follow? he was not ready. would he be the only survivor? what is really going on outside?

## THE CORONAVIRUS

This virus appears in 2020 when a Chinese citizen named Wu from Wuhan decides to taste a critter on the black market during a challenge with a friend. Wu doesn't know it yet but he becomes the sworn enemy of the world. Wu begins by contaminating all the inhabitants of Wuhan who are more numerous than normal due to the Chinese New Year. A few days later, a large part of the Chinese returned to their country and mostly to Europe. That's when Western Europe was affected by this coronavirus, where 700,000 cases were confirmed. Counted no less than 200,000 deaths in Europe. The Americans are affected a few weeks later. The United States becomes the most affected country in the world with 1.2 million confirmed cases and more than 70,000 deaths....

This coronavirus is bigger than the last one 2003.

Bind by fear

In a world ravaged by a virus for years, the coronavirus, only some people are immunized and most do not know but they all have one thing in common. Myrian is one of them, but she feels extremely alone and decides to go in search of other survivors, but she didn't expect what she'd find out.

## The pandemic then humans.

Several months after the pandemic, more than half of the population was decimated.

Left to their own devices and without resources, people were therefore confronted with themselves.

The disease called "Corona" changed the behavior of humans.

It was the start of a long war.

Patrik a comando chief took his squadron and began to make peace.
